Immediate Denture Informed Consent

An immediate denture is a partial or full denture to replace extracted teeth, and delivered on the same day of extractions.

Immediate dentures are a good option for many patients when replacement teeth are needed immediately following extractions. **As the mouth heals, the gums and soft tissues will change shape, and a reline or remake of the dentures will be necessary after a period of about 4-6 months.**

Immediate dentures are a separate procedure from the reline procedure. **Please keep in mind that any reline or remake procedure will be a separate procedure and additional fees will apply to the reline or remake.**

Current fees (before insurance benefits applied) are \$435 for Reline & \$1220 for Remake

Immediate denture procedures are usually completed in the following sequence of appointments:

1. Consultation/Preliminary Impressions (wait one week)
2. Extractions/Try-in/Delivery of Immediate Denture
3. Follow-Up Appointments for initial adjustments (first 1-2 weeks)
4. **Reline/Remake (after 4-6 months)**

I fully understand all of this information and consent to treatment
